How will mobile push help you?

- Mobile push notifications encourage app return visits—**maintain reader interest and loyalty**.
- Delivered directly to mobile devices, these mobile notifications serve as the **primary source of information for users**.
- The speed and simplicity of mobile push notifications mean they can go **from preparation to delivery in just minutes**.
- Push notifications are **the most cost-effective online communication channel**, allowing for a low-cost communication strategy.

PushPushGo - tools for online publishers

- Build a base of **engaged audiences**.
- Send **mass and targeted campaigns** directly to their mobile devices.
- Streamline the sending process using **dedicated tools** like Multi Push, Rocket Push, and RSS integration
- Create **automation scenarios and transactional communication** for logged-in portal subscribers.

Support from an Account Manager will help users fully leverage the capabilities of push notifications.

Try PushPushGo solutions and grow with us

- Integration in three steps.
- Dedicated SDK libraries for Android, iOS, and Flutter
