# PUSHPUSH GO

Inbox by PushPushGo

Re-engage your visitors and keep them up to date with your website

Inbox lets your visitors get up to date with notifications they might have missed. Hidden under the bell widget on your website, the feature empowers your subscribers to interact with your messages in the way that is most convenient.

Smart and discreet information

- ✅ No more missed breaking news or discount codes - important notifications will be stored in the Inbox for a specified period.

- ✅ Storing the Inbox under the bell widget saves the website from clutter.

- ✅ You can customize the widget icon to best suit your layout and visual identification.

- ✅ Choose what matters: decide which notifications (both onsite and web push) will be available for your guests in their Inbox.

- ✅ Empower your guests to choose the notifications they want to see and delete the rest.

A perfect fit for every business

- Keep customers up to date on your e-commerce offer and promotions.
- Store updates on topics covered on your news portals, especially when important news breaks and is being updated.
- Inform your customers about new regulations concerning their savings and their safety, building trust in your fintech.
- Ensure your telecom clients can get the news about new tariff plans or service disruptions in one place.

Build trust and empower informed decisions with Inbox.

Easy setup and management

- Elevate your strategy by choosing the right messages to fit your Inbox.
- Customize the looks to fit the website.
- Manage notifications' lifetime and keep the feature relevant.

Getting started.

Contact our team at support@pushpushgo.com to request a demonstration and pricing options for onsite notifications.
